2 Location and social networks

Ranking Twitter

Twitter

- **Twitter** is an online service that allows users to publish text-based post up to 140 characters (“tweets”).
- Twitter was launched in 2006;
- Now: 200 million users;
180 million tweets and 1.6 billion search queries per day

Ranking Twitter

Demographics

Who?

- 5% of twitter users create 75% of the content;
- 54% of Twitter users are female, 46% users are male;

Ranking Twitter

Pointless babble

What?

- 40% of tweets are **pointless babble** (“I’m eating a sandwich”)
[Pearanalytics, 2009]

By Time of Day	11:00	11:30	1:30	2:00	2:30	3:00	3:30	4:00	4:30	5:00	
News	9	7	5	11	9	5	8	7	5	6	72

Ranking Twitter

followers (1)

Ranking Twitter

Ranking Twitter

followers (1)

● # followers;

1	Lady Gaga (@ladygaga) mother monster	12,736,208 followers	142,052 following	1,001 tweets
				
2	Justin Bieber (@justinbieber)  NEVER SAY NEVER 3D out on DVD NOW!! SOMEDAY out June 20th...and thank you to the fans...who are always there for me and I will always be there for them	11,956,331 followers	116,205 following	10,310 tweets
				
3	Barack Obama (@BarackObama) This account is run by #Obama2012 campaign staff. Tweets from the President are signed -BO.	9,717,786 followers	691,235 following	1,725 tweets
				
4	Katy Perry (@katyperry)  i kissed a girl AND diddled her skittle.	9,210,251 followers	78 following	3,246 tweets
				
5	Kim Kardashian (@KimKardashian)  business woman, exec producer, fashion designer, perfumista	9,087,602 followers	135 following	8,629 tweets
				

twittercounter.com/pages/100

Ranking Twitter

followers (2)

- spammers have far more followers than average users [Yardi et al., 2010];

The screenshot shows an eBay search results page for the query "twitter followers". The page displays 223 results. The top navigation bar includes the eBay logo, a search bar, and links for "My eBay", "Sell", "Community", and "Customer Support". Below the navigation bar, there are tabs for "CATEGORIES", "ELECTRONICS", "FASHION", "MOTORS", "TICKETS", "DEALS", and "CLASSIFIEDS". The search results are listed in a table with columns for item details, price, and shipping. The first three items are:

Item	Price	Shipping
2000 Twitter Followers No Password No Following Other Guaranteed followers - 50% off - 2-5 Days Delivery Time	\$34.99	Free shipping
Buy 250 TARGETED (keyword & location) Twitter followers	\$6.99 / \$10.99	Free shipping
Established Twitter page with over 1000 followers!	\$7.50	Free shipping

The left sidebar contains filters for "Categories", "Condition", and "Related Searches". The "Categories" filter shows "Specialty Services" (135), "Web & Computer Services" (135), "Business & Industrial" (44), "Businesses & Websites for Sale" (44), "Everything Else" (24), "Advertising Opportunities" (17), "Education & Learning" (4), and "Information Products" (3). The "Condition" filter shows "New" (23), "Not Specified" (200), and "Choose more...". The "Related Searches" section lists "facebook likes", "youtube account", "tweets", "twitter", "twitter followers no password", and "twitter page".

Ranking Twitter

#followers/#followee

- 72% of users follow more than 80% of their followers;
80% of users have 80% of their friends follow them back. [Weng et al., 2010].

Ranking Twitter

#followers/#followee

- $\frac{\#followers}{\#followee}$ ratio;

Ranking Twitter

#followers/#followee

Ranking Twitter

#followers/#followee

- ratio: Oprah: $1.67 \cdot 10^5$;
CNN Breaking News: $1.04 \cdot 10^5$;
Lady Gaga 18.08;
from [Gayo-Avello and Brenes, 2010];
- discounted ratio = $\frac{\#followers - reciprocal}{\#followee - reciprocal}$

Ranking Twitter

Other techniques

- PageRank;
- TunkRank;
- TwitterRank;

Ranking Twitter

TunkRank

- **TunkRank** by Daniel Tunkelang (tunkrank.com)
- assumptions:
 - (1) every user has a given *influence* that is a numerical estimator of the number of people who will read his tweets;
 - (2) users' attention to their followees is equally distributed;
 - (3) user X will retweet a tweet by user Y with defined probability $p^{retweet}$;
- just 2% of tweets are retweets (Dan Zarrella, "The science of ReTweets report");
2,87% in [Gayo-Avello and Brenes, 2010].

Ranking Twitter

TunkRank

- TunkRank:

$$Influence(X) = \sum_{Y \in Followers(X)} p^{notice} \left(\frac{1 + p^{retweet} Influence(Y)}{|Following(Y)|} \right)$$

- p^{notice} is total attention of the user devoted to Twitter;
- $p^{retweet}$ is retweet probability;

Ranking Twitter

Twitter rank

- TwitterRank [Weng et al., 2010]: to rank users separately for different topics
- PageRank + topical similarity between users;

Ranking Twitter

Comparison

- comparison [Gayo-Avello and Brenes, 2010]:

Twitter study

Spanish revolution

- **15-M Movement:** series of peaceful demonstrations in Spain.
- several weeks of sit-ins in 58 cities.

Location-based social networks

Introduction

Location and social networks.

Location-based social networks

969 people like this. Be the first of your friends.

Foursquare has just gained its highest-profile user yet: President Barack Obama.

"The White House is now on Foursquare, a location-based social networking website, which is the latest way for you to engage with the administration," The White House said on [its blog](#). "There are over 10 million people already "checking in" around the world, and now you'll be able to discover "tips" from the White House featuring the places President Obama has visited, what he did there, plus historical information and more."

Location-based social networks

Social ties and geographic distances

- Social ties and geographic distances
- **Popular assumption:** individuals try to minimize the efforts to maintain a friendship by interacting more with their spatial neighbors.
- online tools and long-distance travel might result in the ‘death of distance’.

Location-based social networks

Social ties and geographic distances

- Flickr [Crandall et al., 2010];
in 60% cases: users are friends if they have 5 co-occurrences within a day (in distinct cells with sides equal to 1 latitude-longitude degree).

Location-based social networks

Social ties and geographic distances

Probability of a friendship between two individuals as a function of their geographic distance.

(a) livejournal [Liben-Nowell et al., 2005], (b) facebook [Backstrom et al., 2010]

Location-based social networks

foursquare & gowalla

Service	brightkite	foursquare	Gowalla
Nodes	54,190	258,706	122,414
Social links	213,668	2,854,957	580,446
Average degree	7.88	22.07	9.48
Average clustering coefficient	0.181	0.191	0.254
Average distance between friends [km]	2,041	1,442	1,792
Average distance between users [km]	5,651	8,494	5,663

from [Scellato et al., 2011]

Location-based social networks

foursquare & gowalla

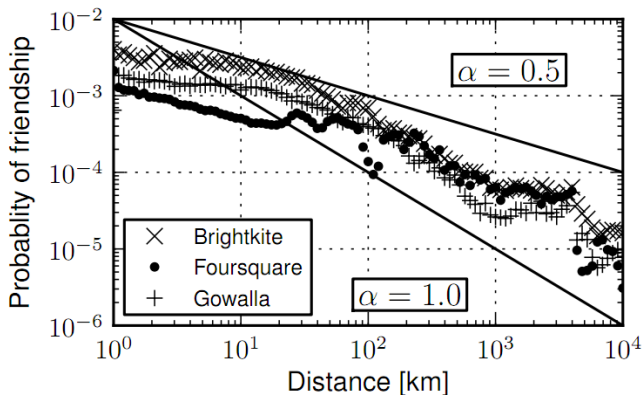

Friends tend to be much closer than random users: about 50% of social links span less than 100 km, while about 50% of users are more than 4 000 km apart.

Location-based social networks

foursquare & gowalla

Probability of friendship vs. geographic distance

Location-based social networks

facebook

- user characteristics vs. location sharing and responds [Chang and Sun, 2011]

(a) male

(b) female

- **to predict next check-in**

strongest: the number of previous check-ins by the user;

significant: is the number of check-ins previously made by friends;

small but significant: the day;

not significant: the day of week.

- **to predict response**

significant: the distance between the user (comments) and the actor (checks-in);

the actor is near the user → the likelihood of a comment goes up dramatically.

likes	comments
disneyland	hospital
fitness	medical
in-n-out	airport
disney	center

Table 4: Top words predictive of likes and comments.
